INTRODUCTION

Environmental Management System standard state the requirement for an organization to develop and implement policies and objectives which take into account the legal requirements and other requirements to which the organization subscribes, and information about important environmental Aspects.

An effective EMS Internal audit provides a solid framework for meeting customer challenges and realizing benefits such as environmental protection, resource conservation and improved energy efficiency to your Organization. Optimize your auditing skills in line with the internationally recognized ISO 14001:2015 and boost your internal audit capabilities.

This course develops the necessary skills to assess and report on the conformance and implementation of processes based on ISO 14001:2015. It also helps the delegates to plan, , conduct and manage internal audits of an Organization in accordance with ISO 19011- Principles & Guidelines of Auditing and distribute audit reports and complete follow-up activities.

OBJECTIVE

- Upon completion of this programme, the participants will be able to:
- correctly Understand the requirements of ISO 14001: 2015 standard and how they apply to the processes of an organization.
- Conduct an effective EMS Gap analysis and identify the Environmental Aspects& Impacts.
- Identify the Potential Emergency Situations and effectively conduct the Evaluation of Legal compliance.
- Conduct an effective EMS internal audit and coordinate during the third-party Certification audit.
- capable to make documents for the organization for effective implementation of ISO 14001: 2015/ EMS

METHODOLOGY
